

Revisited

The OFWIM Vision

Vision Candidates

- To be a bridge between resource and technical disciplines in order to effectively apply technology to the information and data needs of natural resource management.
- To be a forum for sharing the best management practices for resource information handling so individual agencies and organizations can benefit from the lessons learned of the group.
- To promote partnering, collaboration, and best management practices on common information technology projects among natural resource agencies and organizations.

Key Concepts

- To be a **bridge** between resource and technical disciplines in order to effectively **apply technology** to the information and data needs of natural resource management.
- To be a forum for **sharing** the **best management practices** for resource information handling so individual agencies and organizations can benefit from the lessons learned of the group.
- To promote **partnering, collaboration,** and **best management practices** on common information technology projects among natural resource agencies and organizations.

Blended Vision Statement

- To be a bridge between natural resource and technical disciplines to promote partnering, collaboration, sharing of ideas, and best management practices in order to effectively apply technology to the information and data needs of natural resource management.
